Languages: Java, JavaScript, TypeScript, C++

Frameworks: Spring Boot, Angular, JUnit, Selenium, Cucumber, Node.js

Tools & Platforms: MongoDB, RESTful APIs, GitHub Actions, Talend, Maven, Git, Unreal Engine, Jira

SUMMARY

Software Engineer specializing in backend development and test automation using Java, Spring Boot, TypeScript, and Angular. Experienced in building and shipping Unreal Engine 5 games in C++. Passionate about delivering high-quality software through shift-left testing and CI/CD integration.

WORK EXPERIENCE

Charles Schwab | Associate Software Development & Engineering

June 2025 – Present

- Designed and executed end-to-end RESTful API integration tests using Java, Spring Boot, and MongoDB within GitHub CI/CD pipelines, catching 50%+ of integration failures before production.
- Engineered an automation test suite achieving 80% code coverage across Angular/TypeScript and Java Spring Boot microservices with Selenium, reducing manual testing effort by 60-70%.
- Identified and documented 100+ critical bugs during new feature development cycles using Jira, reducing production incident rates and enabling early-stage defect resolution before release.
- Stepped in as interim Senior SDET Lead for one month, managing an offshore QA team, conducting pull request reviews, and partnering with dev teams and business leaders during sprint planning to define scope and tests.

Scala Design | Software Engineer

January 2024 – March 2025

- Translated client requirements into responsive JavaScript web solutions, delivering projects within a 1-week turnaround and maintaining 100% on-time delivery.
- Refactored JavaScript reducing site loading time and responsiveness by 25%.

Curacao | Website Optimization Intern

May 2021 – August 2021

- Analyzed user testing data to optimize JavaScript site responsiveness across 15 platforms and 4 browsers.
- Implemented usability enhancements increasing website conversion rate from 3% to 5.2%.

PROJECT EXPERIENCE

Bleak Contact | Gameplay Programmer | Game Designer | QA

December 2025

- Built an Unreal Engine 5 game in C++ and Blueprints, reaching 17,000+ impressions and trending on itch.io.
- Engineered 5 gameplay systems with camera controls, movement, and ray-traced environmental interactions.
- Executed functional, performance, and qualitative QA with 15+ playtesters, resolving critical bugs pre-release.

War Card Game | Gameplay Programmer | Game Designer | QA Tester

May 2024

- Developed Java game mechanics using object-oriented programming supporting 3 million+ possible outcomes.
- Shipped a fully functional game across 5 sprints with zero critical bugs.
- Delivered project using agile methodologies, Git version control, and 13 pages of Javadoc documentation.

EDUCATION

Texas State University | College of Science and Engineering

San Marcos, TX

Bachelor of Science Computer Science, Minor in Applied Mathematics

May 2025

Organizations: Game Developers Society, Google Developer Student Club, Fencing Club – Team Captain

Certifications: Google Cloud Certified – Associate Cloud Engineer, GitHub Actions, GitHub Foundations

Interests: Fencing, Esports, Game Jams, Hackathons, Japanese, Travel
